

Accelerate and simplify the sharing of sensitive
information in a secure Virtual Data Room

Securing, accelerating and simplifying the sharing of sensitive or confidential documents.

DilRoom

THE BASICS OF DILROOM

DilRoom is a virtual data room solution accessible in SaaS mode (Software as a Service) which secures, accelerates and simplifies the sharing and distribution of sensitive or confidential information.

Assisted implementation

The creation wizard makes the process of setting up the data room extremely simple (importing a folder structure with automatic indexing, importing contacts via an Excel file, selecting notification options and configuring the Q&A feature).

Managing permissions by user group and folder

To control access to documents as precisely as possible, DilRoom allows you to define rights to carry out specific actions for specific groups of users and specific folders.

Read-only previewing

To guarantee permanent control over the files distributed, DilRoom includes an online previewing tool so that files can be shared with read-only access.

File protection

When PDF documents are previewed online, a watermark automatically appears on each page of the document, showing the date and user name.

File DRM

This module provides dynamic remote control over which actions can be carried out on downloaded PDF files (opening the file, preventing printing and preventing screen capture).

Notification management

A notification systems provides users with real-time information and smooth access to new documents.

Temporary suspension of access

Access to the whole data room can be suspended temporarily with a single click. All your contacts will automatically be notified whenever the data room closes and reopens.

SUPPORT & ASSISTANCE

- 24/7 telephone support
- Dedicated telephone training
- Training webinar
- On-site support

WHEN DO YOU NEED DILROOM?

DilRoom

Securing, accelerating and simplifying the sharing of sensitive or confidential documents.

THE Q&A MODULE

- Management of access rights to the Q&A module
- Q&A module with or without moderation
- Automatic notifications
- Option of adding attachments to answers
- Limits on the number of questions each contact can ask
- Intuitive and simple management

The manager can moderate the questions: blocking questions, answering them himself or passing them on to an expert. The questions are not visible to other contacts until an answer is given. The person who answers can choose whether to publish the reply to the whole data room, a particular group or only the enquirer.

Q&A Interface

New question Forwarded Answered Refused

Nr of elements : 0 Reply Search

ID	File name	Requester	Request date	Message
0003	Organization chart	Jérémy Sack - Bidder - 2	06/02/2014 11:17	2
0001	Notice of meeting	Kevin Baud - Bidder - 1	06/02/2014 11:14	2

Kevin Baud 06/02/2014 11:14
Have you notices of meeting for 2013 ?

Lincoln International 06/02/2014 11:45
Yes they will be given later

CONFIGURABLE REPORTING WITH DASHBOARDS

This module is dedicated to the manager. Reports are generated on buyers' activities (the most viewed documents, the most downloaded files, the keywords most searched for etc.) and can be exported in Excel or PDF format. The manager can filter the report by group (to compare groups) and date (with one week by default) and send the report easily.

- Tailored reporting:
 - The most active groups
 - The most viewed documents
 - The most downloaded documents
 - Q&A activity
 - The keywords most searched for
- Intuitive management
- Choice of display type
- Creation of dashboards

Reports

Scorecard [edit] [refresh]

Display period : The last 7 days [dropdown] Export

Defined for each report

Documents viewed

- The last 24 hours
- Fidier The last 7 days
- Notice of ... The last 30 days
- Notice of ... The last 90 days
- Notice of ... Specific period
- Since the date of implementation of the Data Room

Activité Q&A

Report name : Q&A activity

Report type : Q&A activity

Files concerned : Top 25 most processed [dropdown] Choose

Period : The last 7 days

Start date : 6/10/14 [calendar]

End date : [calendar]

Q&A status : All statuses

Contacts concerned : The whole Dataroom

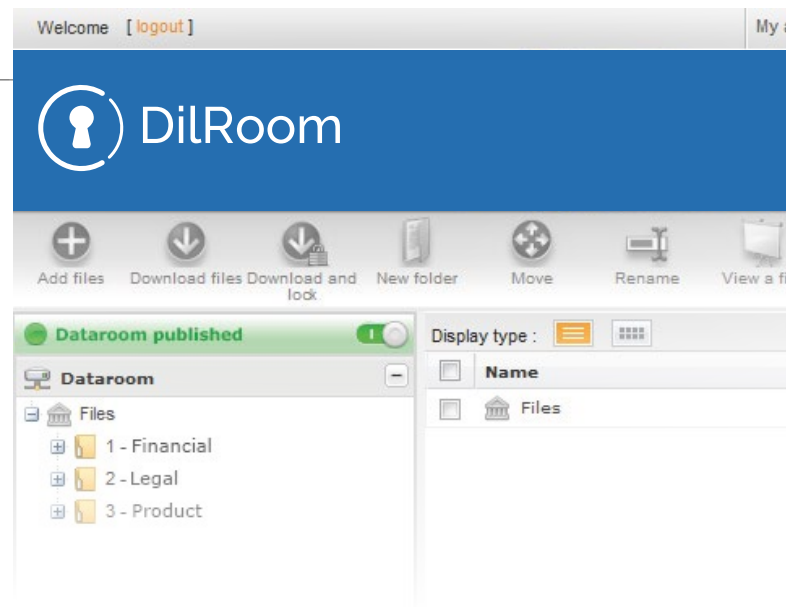

Display : Detailed (list and graph)

Display type available : [list] [graph]

Default : [list] [graph]

EASE OF USE

- ▶ **Intuitive**
- ▶ **No need for user training**
- ▶ **Customer Care:** User Help Desk in five languages (DE/FR/EN/SP/NE)
- ▶ **Platform available in 11 languages**
- ▶ **Compatible with most operating systems and Web browsers** (PC, MAC, Android, Blackberry & iOS)

APPLICATION SECURITY

- ▶ **Access security:** Password encryption with choice of signature & password control via the supervision control panel
- ▶ **Secure transfers:** TLS encryption on all file transfers
- ▶ **Secure file storage:** Store files securely with data compression and encryption using passphrases chosen by the client
- ▶ **Secure encryption keys:** Implementation of an HSM box to store data encryption keys
- ▶ **Mobile Security Module:** TLS channel & data storage encryption, security code setting, remote wipe, option to block certain functions, remote cache control
- ▶ **ISO 27 001 certification:** Oodrive solutions and hosting are ISO 27 001 certified
- ▶ **Strong authentication by certificate or SMS**

HOSTING

Oodrive offers three hosting modes to comply with your business and security constraints:

- SaaS: the solution is hosted on a shared infrastructure in an Oodrive datacenter
- Private Cloud: the solution is running on a dedicated infrastructure in an Oodrive datacenter
- On-Premises: hosted by the customer or in a data center chosen by the customer

INTEROPERABILITY

The solution integrates seamlessly into the company infrastructure:

- **It interfaces with the company directory** (Active Directory, Open LDAP...) and other business applications via its APIs
- **It offers Single Sign-On based on the SAML V2 protocol**

THE SAAS / PRIVATE CLOUD GUARANTEES

As a specialist of Trusted Cloud Solutions, Oodrive delivers best-in-class quality of service in SaaS and Private Cloud modes.

- **Hosting in the country of choice:** France, Belgium, Switzerland, Germany or Brazil.
- **High service availability*** (99.99% availability rate during the past 12 months*)
- Data replicated in different **ISO 27001 certified data centers**
- Accelerated flow for improved performance: File transfer time optimized in over 70 countries thanks to AKAMAI technology

*Measured by an independent external organization

ONLINE FILE SHARING & COLLABORATION

BACKUP & ARCHIVING

DIGITAL TRUST

THE OODRIVE GROUP

- Created in **2000**
- **More than 15 years'** experience in secure online file management
- **310** employees
- **15,000** professional clients
- More than **1 million** users
- Solutions published in **14 languages** and used in more than **90 countries**
- **7 international offices:** France, Belgium, Germany, Spain, Switzerland, Brazil and China
- More than **1,000 reseller partners**
- Renewal rate **over 95%**

CERTIFICATIONS

- Our hosting is ISO 27 001 certified
- Cloud Confidence: Data protection policy standards
