

SYNCHRONIZATION FOR VSBS / SMES

Multi-device and multi-OS synchronization,
100% European

PROFESSIONAL SYNCHRONIZATION

Oodrive Sync lets VSBS/SMEs synchronize their files from all their devices (PC, tablets, cell phones) in the Cloud so as to be able to access their data any time.

CONTROLLED COLLABORATIVE WORK

Oodrive Sync allows collaborative work to be managed internally or externally with company contacts using its document sharing functions and ergonomic administration. .

OODRIVE SYNC BASIC PRINCIPLES

- 1 / **SYNCHRONIZE AND SECURE** your professional data and that of your employees on all devices (PC, tablets, cell phones).
- 2 / **ACCESS** your files anywhere and from all your devices.
- 3 / **SHARE** files with your contacts easily and securely.

OUR COMMITMENTS

Hosting in Europe

- ▶ Data is sent to two hosting centers, more than 30 km apart and located on European soil
- ▶ High-performing infrastructure: 24-hour surveillance, fire doors, electrical security, fire detection, codes and customized alarms, etc.
- ▶ ISO 27 001-certified hosting

Ergonomic administration

Oodrive Sync is administered via the Oodrive Vision Supervision Console. With just a few clicks, user activities, creation of new users and rights management can all be monitored.

Constant development

Oodrive Sync continues to evolve each month thanks to the Agile method used by Oodrive. Memo creation and synchronization, as well as advanced control of rights are some of the upcoming features.
